

# ULTIMATE CHECKPOINT SYSTEM 2

WITH 15 MINUTES A DAY YOU CAN START MAKING MONEY RIGHT NOW !

**NOW THAT YOU'RE FINALLY TIRED OF ALL THE HYPE AND PROMISES THAT MILKED YOU OF WHAT LITTLE CASH YOU HAD AND LEFT YOU WITH NOTHING BUT BROKEN DREAMS AND EMPTY POCKETS, ARE YOU READY TO CHANGE COURSE?**

I bought so many self-serving systems I was ready to QUIT for good! The really weird part was, the main reason they all failed for me was because of the same minor problem, They Failed to Duplicate. But the truth is, MLM is STILL the answer to a steady residual income common people can build for a better future.

Then I discovered the simple solution! A system you can start for only \$1 that uses a drop-in method to duplicate itself for **ANYONE**, from the true beginner to the most advanced. AND the cost is low enough that NOT ONE SINGLE SOUL is excluded, so the potential is endless!

I have all the templates set up with videos to show step-by-step how to apply them and where to get free resources to make it all grow. Why wouldn't I charge more than \$1? If you make money with this, I do too! So it's in my best interest to help you succeed without gouging you.

I'll always be honest with you and I have to tell you, this is so good there's no way I'm going to just throw it out there and let everyone abuse it. So I set up a series of simple checkpoints you need to pass through to show you're serious and not just curious, before I spill the beans.

**Here's the first three:** *(The third one is at the bottom of the next page)*

1- Get a free [PayPal Premier or Business](#) account (if you don't have one). You'll need it to hold all the money you make while you're off doing the other stuff you always wanted to.

2- Get a [FREE Gmail](#) account just for this plan. Then register it with your PayPal account and make it primary. *(Click on My Account, Profile and Add or Edit Email)* You can still use any other emails registered there, but you want this one set up for all your automatic payments that will soon be coming in response to the ads I show you how and where to run.

This plan does NOT use squeeze pages or other opt-in lists, we don't chase anyone, buy leads, spend a fortune on ads or make cold calls. There are no extra monthly fees to drain your wallet and you can bail out at any time. Your new referrals will be coming to you, asking to join.

Don't worry, you can do anything I show you with no problems or I'll personally do it for you. The income can easily reach hundreds in PROFIT your first month. That's because the only expense is \$10 a month and I'll show you how to get that FREE before you start. NO RISK!

If you're still with me and need a little more detail, please keep reading. For those ready to get started now, scroll to the bottom of the next page for checkpoint three.

I spent money for just about every system I could find to research out a new and better way. They all used the squeeze page method to capture your name and email so they could pound you with an autoresponder and extract more money from you for all the tools and resources needed to apply their system. Hey I'll even give you the links to a few if you're a masochist.

[James Grandstaff's Double Your Downline](#) *(I bought his 3-step script for \$100)*

[The Downline Code](#) *(I'll legally give you this one as a free bonus)*

[Burke Jones MLM Pro Secrets](#) *(I still get commissions on this one)*

[David Parnell's Residual Wealth Factor](#) *(I can still use this one until my year runs out)*

Of course if you're going to duplicate their systems, you need more monthly fees for hosting, a \$20 a month autoresponder, an advertising budget big enough to choke a horse and as many other resources they can find with fat commissions so they can extract all they can from you.

## It still won't guarantee you'll succeed, only that they will!

They all promote the same MLM program that I do, [Global Domains International](#), because it really is the best if you have a system. It's still going to cost you the same \$10 a month, but by using my system it builds a residual income just as fast as a more expensive one will. I still think an honest hard working team with the right free tools can be just as successful as using a system you need to throw more money at than you make back.

The biggest difference is fewer quit. When I realized how much I had to spend in expenses to make their systems work, it didn't take long to see the conversion ratios wouldn't support the costs for many months to come. That's why I set the price for this new system at a one time \$1 charge and that's ALL. It's not going to drag anyone down and when they see it start working to put them into a positive cash flow right away, they aren't going to go anywhere!

So invest a buck and see if what I came up with fits your style, I guarantee it'll fit your budget! Then give me a few days to show you the money, fair enough?

If you want to learn a little more about who this crazy old man is, go visit my profile on Yuwie and read some of my Blog entries and videos. Look over a few of the comments on my pages and see what others who have known me a while think. [Click Here](#)

Then come back and read this report again, you did save it to your desktop, didn't you?

Now it's all up to you, is it fish or cut bait? You can only lose \$1 and you just might learn something no matter what you decide to do next.

**[3- CLICK HERE TO PAY YOUR \\$1 FOR THE NEXT STEP](#)**
